## Summary

I am a Computer Science student interested in MERN stack development. I like building web applications and solving problems using DSA. I have some hands-on experience in full-stack projects, and I am looking for an opportunity where I can learn more and grow while contributing to real projects.

## Education

**Noida Institute of Engineering and Technology, Greater Noida** *Nov 2022 – June 2026*

*Bachelor of technology in Computer Science | Score – 7.10 CGPA*

**St. Al Haneef Inter College, Varanasi** *April 2021 – March 2022*

Intermediate, Score- 72%

**St. Al Haneef Inter College, Varanasi** *April 2019 – March 2020*

High School, Score- 74.17%

## Experience

**Internship, Frontend Web Development | OASIS INFOBYTE** *10 Sep 2024 – 15 Oct 2024*

Designed and developed multiple responsive web projects using HTML, CSS, and JavaScript, including a **landing page**, a personal **portfolio website**, and a **temperature converter**, focusing on clean UI, interactivity, and real-time user-friendly functionality.

**Training, Object Oriented Technology | NIET** *10 Sep 2023 – 15 Oct 2023*

Completed Object-Oriented Programming (OOP) training, gaining hands-on experience with core concepts such as classes, objects, inheritance, polymorphism, abstraction, and encapsulation using real-world examples and coding practice.

## Projects

**Background Changer**| *React.js* *Feb 2025 – March 2025*

- Developed an interactive web application that allows users to dynamically remove and change backgrounds and Download Image using React.js.
- Integrated the Remove.bg API to automatically remove image backgrounds with high accuracy.
- Managed version control and collaborative development using Git and GitHub.
- User-friendly interface with responsive design for both desktop and mobile devices.

**Expense Tracker**| *MERN* *June 2025 – Aug 2025*

- Developed a **full-stack Expense Tracker web application** that allows users to add, edit, delete, and categorize daily expenses using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Used **MongoDB** to store and manage user expense data with optimized schema design.
- Used Git and GitHub for version control, code collaboration, and regular updates.
- User-friendly interface with responsive design for both desktop and mobile devices.

## Technical Skills

**Languages**: Java, JavaScript, HTML/CSS
**Framework**: React.js , Node.js, Express.js
**Developer Tools**: VS Code, Visual Studio, IntelliJ, GitHub
**Data structure**: Array, String
**Database**: MongoDB, MySQL
**Relevant coursework:** OOP, Data Structure, DBMS, Web Technology

## Certifications

| | | |
|---|---|---|
| **React.js**: | Infosys Springboard | Oct 2024 |
| **Java programming fundamental**: | Coursera | *April 2024* |
| **Natural language processing for developer:** | Infosys Springboard | March 2026 |
